RADON SYSTEM ALARM

Radon System Alarm is a patent-pending advanced vacuum monitoring device that provides homeowners with visual and audible indicators of low radon mitigation system vacuum pressure. Low vacuum pressure may require contractor intervention to correct and can change subtly over time. The alarm lets homeowners know before these changes become problematic.

RADON ACCESSORIES

Image	Model	Description
	Manometer ARN05M BUY NOW	Mounts to the outside of PVC pipe on a radon mitigation system and measures vacuum pressure in real time, helping to indicate potential issues with the fan. It can serve as a secondary indicator that vacuum pressure has changed in the event of a system alarm going off, helping to confirm that it's not a false alarm.
	Transition Fitting ARNTF4 BUY NOW	Consolidates the number of fittings needed in outdoor radon mitigation system installations. Connects a 4" fan pipe to a 4" exhaust pipe with a weir (not included) for capturing and draining condensate. Weir is included in the Condensate Bypass Kit.
	Condensate Bypass Kit ARNCBK BUY NOW	This kit is designed to drain condensation around the fan in outdoor installs.
	Radon-T Fitting ARNSIT BUY NOW	Designed for use in adding radon mitigation to new construction and crawl spaces. Provides 4-way airflow, allowing moisture and soil gases to be drawn from all angles.

MODEL 400 | WHOLE HOUSE HUMIDIFIER AUTOMATIC WATER SAVER FURNACE HUMIDIFIER

AprilAire introduced the first evaporative humidifier for forced air furnace systems back in 1954. Since that time, AprilAire has continued to lead the industry in whole-home humidification systems. Our evaporative humidifiers work by piping water into the distribution tray located at the top of the humidifier. The water is uniformly distributed across the width of the tray and through a scientifically designed system of outlets. It flows by gravity over the water panel evaporator. Dry, hot air from the HVAC system is

HUMIDIFIERS

MODEL 700 | WHOLE HOUSE FAN POWERED HUMIDIFIER AUTOMATIC HIGH OUTPUT FURNACE HUMIDIFIER

The AprilAire Model 700 Humidifier is a whole-home solution that helps you achieve total comfort through humidity control.

Our evaporative humidifiers work by piping water into the distribution tray located at the top of the humidifier. The water is uniformly distributed across the width of the tray and through a scientifically designed system of outlets. It flows by gravity over the water panel evaporator. Dry, hot air from the HVAC system is moved through the moisture-laden water panel evaporator. Natural evaporation takes place, turning the water into vapor, and the humidified air is then circulated throughout your home.

Included in the box: installation instructions and template, humidifier with a built-in fan, 24 VAC transformer, automatic digital humidifier control, outdoor temperature sensor, saddle valve, solenoid valve, and water panel.

[BUY NOW](#)

MODEL 720M | EVAPORATIVE HUMIDIFIER HIGHEST CAPACITY APRILAIRE EVAPORATIVE HUMIDIFIER

A cross-axial fan on the Model 720M humidifier pulls heat directly from the furnace. The model 720M is the highest capacity AprilAire evaporative humidifier. Easy to install, it's the best choice for systems with low or variable speed air handlers. A manual humidistat is provided with all 720M models; for applications where an automatic control is not practical.

[BUY NOW](#)

MODEL APRILAIRE 800 WHOLE HOUSE STEAM HUMIDIFIER HIGH OUTPUT HUMIDIFIER

This whole-house steam humidifier adds moisture to your home by passing steam through a dispersion tube connected to your duct system. The steam is created by heating water in an internal canister.

MODEL E080 | DEHUMIDIFIER

THE E080 DEHUMIDIFIERS ARE PERFECT FOR A WIDE RANGE OF APPLICATIONS, INCLUDING WHOLE-HOME DEHUMIDIFICATION AND MOISTURE CONTROL IN BASEMENTS AND CRAWL SPACES

The AprilAire E080 Dehumidifiers are designed to dehumidify the air coming into the unit by passing the incoming air over an evaporator coil, lowering the air temperature below the dew point. Moisture is removed from the air and drained out of the unit to a common floor or waste drain. The air is then reheated in the condenser coil and exits the unit.

Dehumidification continues until the set point is reached, and then the unit shuts off until periodic sampling determines the need for operation.

MODEL E100 | DEHUMIDIFIER 100 PINT PROFESSIONAL-GRADE DEHUMIDIFIER

Recognized as the Most Efficient of ENERGY STAR® 2022, it is ideal for dehumidifying your basement, sealed crawl space, or whole home. The E100 removes up to 100 pints (12.5 gallons) of moisture from the air per day. This helps keep your home's humidity in the ideal range of 40-60% relative humidity to fight viruses, bacteria, mold, and other airborne pollutants.

For your convenience, the built-in digital control can be configured on the top or on the inlet side of the unit for easy access. Its interface makes setup and operation quick and easy.

Designed and manufactured in the U.S., the AprilAire E100 is backed by a 5-year warranty. AprilAire continues to improve the quality of its dehumidifiers with corrosion-resistant aluminum coils, quality manufacturing processes to prevent leaks, and secure packaging for damage-free shipment.

MODEL 8120A DIGITAL VENTILATION CONTROLLER

Today's houses are constructed using "Green" techniques and energy saving systems. These practices and innovations help reduce your utility bills, but prevent the introduction of fresh air. Without ventilation, stale air and contaminants from cleaning, painting, and exhaust from attached garages can remain in the air for extended periods of time. Your AprilAire ventilation controller brings in fresh air and circulates it through your home around the clock to help reduce the stuffy effects of trapped stale air.

MODEL 8120X DIGITAL VENTILATION CONTROLLER INSTALLATION & OPERATIONS MANUAL

The AprilAire 8120X is a controller for your ventilation system. This ventilation controller has the ability to turn off the ventilation system when the humidity or outdoor temperature is too high, keeping your home comfortable. The 8120X comes with a three-button interface and an Easy-to-read LCD screen for a quick and simple setup.

DAMPERS

Image	Model	Diameter
	6506 BUY NOW	6"
	6508 BUY NOW	8"

Each AprilAire damper has an adjustable controlled pressure relief feature. The amount of pressure relief is controlled by a thumbscrew (located on the outside face of the actuator) which determines the stopping position of the blade. All dampers are shipped with the thumbscrew positioned to allow the blade to fully close.

MODEL 8141 FRESH AIR VENTILATOR INSTALLATION & OPERATIONS MANUAL

The Model 8140 & 8141 Fresh Air Ventilators are designed to bring in precisely the right amount of outdoor air into today's efficiently designed homes.
